INTRODUCTION

This document was designed to provide systems analysts and programmers with technical information sufficient for the parsing and loading of ProQuest Dissertations & Theses database records in MARC21/RDA format. All the data we distribute is highly structured and systematically produced. This document will help you to understand ProQuest Dissertations & Theses data and its structure in greater detail, enabling you to more effectively manage the processing of our information on your system.

Subsequent chapters will provide:

- Description of the data format
- A sample record as you might make it appear on your system
- A sample record as it is distributed by ProQuest
- A listing of all fields that can be present in records
- Details of the individual fields that can be present in records

Additional material can be found in the Appendixes. Some of this material can be used to build system lookup tables.

File Delivery Method

ProQuest delivers data from their electronic vault by FTP, or on magnetic or optical storage media.

File Types

ProQuest Dissertations & Theses provides the following kinds of files:

- MARC21RDADATA.MRC—a file containing MARC21 records, corresponding to the dissertations contained in the other discs or files (if any)
- *.CSV file—an index file that identifies--for each MARC21 record--the disc(s) on which the corresponding PDF and any other digital material can be found. Entries in an index file are in Comma-Separated Value format, with a publication number as the first element, followed by one or more disc identifiers
- *.PDF files—complete dissertations, in Portable Document Format
- supplementary digital materials—additional files provided by a dissertation's author; various formats are possible (audio, video, spreadsheets, etc.)

MARC21RDADATA.MRC Record Format

ProQuest creates database records in the following format:

- MARC21/RDA format for bibliographic data (for books)—this format allows transmission of citation and abstracting and indexing information. This structured data is arranged in fields and its content is labeled with a specific set of tags and subfield codes

Character Repertoire and Encoding

ProQuest's MARC21/RDA files—in their uncompressed state—consist of UTF-8-encoded characters from the UCS (Universal Character Set). Some characters serve as delimiters, terminators, or record separators in the MARC21 files.

Record Processing

ProQuest Dissertations & Theses data is sent (whether compressed or uncompressed) as a single MARC21RDADATA.MRC file. Your parsing program will make use of record length, record terminator, and (possibly) record separator information embedded in the file to identify each of the individual records it contains. Further details of this file format appear later in this document.

ProQuest Dissertations & Theses

A dissertation is an in-depth, original research manuscript written by a degree candidate in fulfillment of the requirements for an advanced degree—either a doctoral or masters. Representing the research of nearly every North American university and many other institutions from around the world, ProQuest Dissertations & Theses is your single comprehensive source of dissertation and thesis information.

ProQuest Dissertations & Theses files can include content drawn from these ProQuest dissertation publications:

- CDI - Comprehensive Dissertation Index
- DAI - Dissertation Abstracts International
- MAI - Masters Abstracts International
- ADD - American Doctoral Dissertations

We have over 2.5 million citations in the database, and full text for 1.9 million of them in our vaults. Of those 1.9 million, almost 800,000 are available in PDF format. Over 1,000 graduate schools are represented in the database, with coverage from 1861 to the present. The database includes abstracts from July 1980 forward for dissertations, abstracts from 1988 forward for masters theses, with PDF availability from 1997 forward. All abstracts are written by the authors of the dissertations or theses.

With subjects ranging from the topical to the esoteric, ProQuest Dissertations & Theses is clearly multi-disciplinary. It includes coverage in literature, education, chemistry, engineering, psychology, business, economics, history, philosophy, sociology, and information science.

When you want to identify research trends in a particular field, access recent research methodologies, locate comprehensive subject bibliographies, track development of established technologies, recruit personnel in specialized fields, and track research being done at specific institutions or in specific regions, ProQuest Dissertations & Theses is

unsurpassed for its content and searchability. Approximately 5,000 citations and abstracts are added monthly. Complete lists of schools and subjects are found in the Appendixes.

MARC21/RDA FORMAT

Records and Record Lengths

An individual record consists of all the data associated with one bibliographic entity (the source material). The length of a record (expressed in numeric characters) is indicated by the 5-character Record Length, which is conveyed in the first 5 bytes of each record. A MARC21 record has a maximum length of 99,999 bytes. Every record ends with a record terminator character (hex "1D").

As an option specified at the time of MARC file generation, a record terminator character can also be followed by a record separator--a linefeed character (hex "0A"). If appended to records, these hex "0A" record separators are not counted in calculations of record length. Most of our customers prefer to receive files that do not include such record separators.

Record Layout

The record format is based on the ANSI standard Z39.2 for Bibliographic Information Interchange. Individual MARC21 bibliographic records are structured as follows.

Figure A

Leader 1.0	Directory 2.0	Field Terminator	Data Field Indicators 3.0	Subfield code 3.1
Data Field 3.2	FT 3.3	Data Field 3.0-3.2	FT	Record Terminator 4.0

Each record has four parts as shown below:

- 1.0 Fixed-length leader
- 2.0 Variable-length directory
- 3.0 Variable-length data fields
- 4.0 Record terminator

1.0 Leader

The leader contains 24 bytes (eight-bit characters), as represented below. There is one leader in every record.

Figure B

Record Length	Record Status	Type of Record	Bibliographic Level	Type of Control
1.1	1.2	1.3	1.4	1.5
00—04	05	06	07	08

Character Coding Scheme	Indicator Count	Subfield Code Count	Base Address of Data	Encoding Level
1.6	1.7	1.8	1.9	1.10
09	10	11	12—16	17

Descriptive Cataloging Form	Multipart Resource Record Level	Entry Map
1.11	1.12	1.13
18	19	20—23

1.1 Record length

The record length as expressed in the leader is a five-digit decimal number equal to the total number of bytes (or octets) in the record—including the five digits that comprise this number. Since only five character positions are allotted, the maximum length of any record is 99,999 bytes.

1.2 Record status

A single character in position 5 indicates the status of the record. We use only "n" (new record).

1.3 Type of record

An "a" in position 6 indicates that the record describes language material. A blank in position 6 indicates that the type of content described by the record is unspecified.

1.4 Bibliographic level

An "m" in position 7 indicates that the record describes a monograph/item.

1.5 Type of control

A blank in position 8 indicates "no specified type".

1.6 Character coding scheme

UTF-8 encoding is indicated by an "a" in position 9.

1.7 Indicator count

Position 10 contains a single decimal digit expressing the number of indicators that are going to appear at the beginning of every variable data field. This indicator count is "2" for all records.

1.8 Subfield code count

Position 11 contains a single decimal digit expressing the number of character positions that are going to be used to convey an individual subfield code in the variable data fields. A subfield code consists of a delimiter (hex "1F")—represented in this document as a "\$"—followed by a single alphanumeric character serving as a data element identifier. This subfield code count is "2" for all records.

1.9 Base address of data

A data element in position 12-16 consists of five decimal digits—padded with leading zeros if necessary—and is equal to the combined length (in bytes) of the leader and directory (Figure A, section 1.0 and 2.0). This value also indicates the byte position of the first data field within the record.

1.10 Encoding level

A "3" in position 17 indicates that the record's encoding level is abbreviated.

1.11 Descriptive cataloging form

An "i" in position 18 indicates that the record includes International Standard Bibliographic Description (ISBD) punctuation.

1.12 Multipart resource record level

Position 19 is left blank, indicating "not specified or not applicable".

1.13 Entry map

This item defines the structure of directory entries and consists of four characters in positions 20-23.

Position 20 contains a decimal digit indicating the length (in bytes) of the "length of field" portion of each directory entry. The digit in position 20 will always be "4".

Position 21 contains a decimal digit indicating the length (in characters) of the "starting character position" portion of each entry in the directory. The digit in position 21 will always be "5".

Position 22 contains a decimal digit indicating the length (in characters) of an implementation-defined portion of a directory entry. As we do not have an implementation-defined portion, the digit in position 22 will always be "0".

Position 23 is not defined; the digit in position 23 will always be "0".

Directory

2.0 Directory

The directory is a variable-length field consisting of a variable number of fixed-length entries and a field terminator character. The directory contains one entry for each variable control and data field in the record.

Figure C

Tag	Length of Field	Address of Field
2.1	2.2	2.3
0—2	3—6	7—11

2.1 Tag

The first field in a directory entry consists of a number that identifies the data field addressed by characters 7 through 11 of the directory entry. This field is three characters long.

2.2 Length of field

"Length of field" is the total number of bytes/octetes occupied by the characters in the data field pointed to by this entry. It is not unusual for a UTF-8-encoded UCS character to require 3 or more octets. Counted in the field length value are the data field indicators, subfield code(s) and terminator. This field is four characters long. Since only four character positions are allotted, the maximum length of any field is 9,999 bytes.

2.3 Address of field

"Address of field" is the character position of the first character for the specified data field. This field is five characters long.

All field addresses are taken relative to the beginning of the data field section. The first position of the data field section is position 0. To obtain the offset into the record, where the first byte of the record is 0, add the address of the field to the base address of data. (*See* section 1.9 of the leader.)

NOTE: The end of the directory is marked with a field terminator (hex "1E").

Data Field Format

The record consists of a mixture of variable-length control fields and data fields. Each variable-length data field consists of two indicators, one or more subfield codes, the field data and a field terminator. A subfield code consists of a delimiter and a lower case letter or number. Control fields do not contain indicators or subfield codes, and have tags beginning with the digits "00".

Figure D

Data Field Indicators	Subfield Code	Data Field	Field Terminator
3.0	3.1	3.2	3.3

3.0 Data field indicators

Two indicators occupy the first character positions of a variable data field. Indicators provide additional information about the type of data in the variable data field. A blank is used in an undefined indicator position of a variable data field. Control fields do not contain indicators.

3.1 Subfield code

A subfield code identifies an individual element within a variable data field. There is at least one subfield code per variable data field. Each subfield code consists of a delimiter (hex "1F") and a lower case letter or number. The delimiter is represented by a dollar sign (\$) in this document. Control fields do not contain subfield codes.

3.2 Data field

Data fields are actual information for the record. The specific contents of each data field are described in detail in the MARC21/RDA Tag Descriptions section of this document.

3.3 Field terminator

The final character of each data field is a field terminator (hex "1E").

3.4 Record terminator

A record terminator (hex "1D") appears at the end of every record.

MARC21/RDA delimiters, terminators, and record separators

Record separator = hex "0A" [Customers decide whether hex "0A" separators should appear in files.]
Record terminator = hex "1D"
Field terminator = hex "1E"
Delimiter = hex "1F"

MARC21/RDA Record as it might be displayed on your system

Systématisation du contenu théologique de l'expression « nouvelle évangélisation » à la lumière de la théologie pastorale de Jean-Paul II / Analyse de trois référents théologiques suggérés par la lettre apostolique "Tertio Millennio Adveniente" publiée par Jean-Paul II en 1994

The entire pontificate of Pope John Paul II, polarized by the event of the Jubilee of the year 2000, can be summarized as a long pilgrimage of the Catholic Church towards the Third Millennium of humanity. At the dawn of the XXIst century, having as a sure guide the theological contents of Vatican Council II, the Polish Pope held up for all to see an original pastoral vision marked by the expression "new evangelization". Borrowed from the Latin American Bishops this expression became his emblem and spearhead during nearly 27 years of pontificate. Since it has been largely appropriated by various ecclesial groups, a systematic study of the expression, in the light of the pastoral theology of its privileged discloser, had to be initiated. To do so we chose, as founding text of our study, the Apostolic Letter Tertio Millennio Adveniente, published in 1994, due to its pastoral vision at the dawn of the year 2000. This text, covering the period of the Vatican Council II up to the entry of the Roman Catholic Church in the Third Millennium, defined the temporal framework of our research and permitted us to retain three theological tenets. We analyzed them and produced a theological synthesis through three synoptic views which gradually led the thesis to its conclusion. The Apostolic Exhortation Evangelii Nuntiandi of Pope Paul VI was the starting point; the second theological tenet was the document of John Paul II entitled Sources of Renewal, and the final tenet was the Post Synodal Exhortation Ecclesia in America. By the analysis and the synthesis of these three tenets, with a justified hermeneutical initiative, three outcomes emerged. The first one looked at the pastoral application of the Vatican Council II: in a pastoral outlook justified by a defined anthropology, the minister articulated the Constitutions Lumen Gentium and Gaudium et Spes to suggest a pastoral praxis. The second outcome then developed the notion of the creativity of the faith. This creativity of the faith declined itself in the cultural mediations - third outcome - which articulate themselves around the concepts of attitudes and Wojtylien dialogue. The proposed critical conclusion of the thesis directly concerned the anthropology proposed by John Paul II underlying in each of these three outcomes. **KEY WORDS** New Evangelization; John Paul II; Karol Wojtyla; Pastoral Theology; Evangelii Nuntiandi; Vatican Council II; Jubilee of the Year 2000; Christology; Ecclesiology; Hermeneutics; Dialogue.

792 *	Degree Date	
856	Electronic Location and Access	2009

* These ProQuest-defined fields contain coded information that allows local systems to provide the same level of access to MARC21-formatted ProQuest Dissertations & Theses records as is available from ProQuest's online databases. Local systems must decide whether to include these fields when loading the MARC21-formatted records provided by ProQuest.

MARC21/RDA Tag Descriptions

001 Publication Number 001

Description

This field contains the dissertation's unique identifier, a 7-character "publication number" prefixed by a 3-letter prefix: "AAI". Thus, the length of this field will be 10 characters. For DAI parts A and B and MAI, values 01-07 in first two bytes of the 7-character publication number means the dissertation is not available for sale by ProQuest and should be so designated. For DAI Section C, all publication numbers begin with "C", and none are available for sale by ProQuest. Some DAI parts A and B records (British Dissertations) have publication numbers beginning with "D-" or "DX". Some DAI parts A and B and MAI records (Canadian theses) have publication numbers beginning with "M" or "N".

Format

The field ends with a field terminator.

Examples

AAI0126421

AAIT-00101

AAIMR01390

005 Date and Time of Latest Transaction 005

Description

This field specifies the date and time of the latest record transaction and serves as a version identifier for the record.

Format

The date is recorded in 8 numeric characters in the pattern YYYYMMDD (4 for the year, 2 for the month, and 2 for the day). The time is recorded in 8 characters in the pattern HHMMSS.F (2 for the hour, 2 for the minute, 2 for the second, decimal point, and 1 for the tenth of a second). The 24-hour clock (00-23) is used. The field ends with a field terminator.

Examples

19910826080312.5

008 Fixed Length Data Elements 008

Description

This field provides coded information about the record as a whole and about bibliographic aspects of the item being described.

Format

Fixed-length, 40 characters. The field ends with a field terminator.

Examples

910709s1990 miu|||||m |||||||ger d

920312s1991 miu|||||m |||||||eng d

020**ISBN****020****Description**

This field contains the International Standard Book Number, which is included when available.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the ISBN (without hyphens). The field ends with a field terminator.

Example

```
$a0542111551
```

```
$a9780542111556
```

035**System Control Number****035****Description**

This repeatable field contains a unique publication identifier. These identifiers can be of two kinds--either: (1) a copy of the publication number from the 001 field (allowing a local system to replace the 001 publication number with their own local system control number, while retaining a copy of the PQDT publication number), or (2) a unique string used by ProQuest's ETD Administrator software. Every record will include an 035 field of the first kind. An 035 field of the second kind will only appear in records that were processed by ETD Administrator software.

Format

Two blank indicators, subfield delimiter, data element identifier "a", the ProQuest Dissertations & Theses MARC organization code enclosed within parentheses "(MiAaPQD)", and either the publication number from the 001 field or a different unique identifier used by ProQuest's ETD Administrator. The field ends with a field terminator.

Examples

```
$a(MiAaPQD)AAI8901234
```

```
$a(MiAaPQD)ucmerced:10006
```

040**Cataloging Source****040****Description**

This field contains the MARC organization code of ProQuest Dissertations & Theses--the organization that created the original record in machine-readable form.

Format

Two blank indicators, subfield delimiter, data element identifier "a", the ProQuest Dissertations & Theses MARC organization code "MiAaPQD", subfield delimiter, data element identifier "b", the code "eng" indicating that the language of the record cataloging--but not necessarily the dissertation itself--is English, data element identifier "c", another occurrence of the code "MiAaPQD", data element identifier "e", and the code "rda" indicating that Resource Description and Access cataloging guidelines were followed when creating the record. The field ends with a field terminator.

Example

```
$aMiAaPQD$beng$cMiAaPQD$erda
```

041**Language Code****041****Description**

Whenever more than one language is associated with a thesis or dissertation, this field will appear in the record and will contain codes indicating all of the languages involved. The meanings of the codes can be found in the [MARC Code List for Languages](#). But if only one language is involved, this field will not be present in the record. In that case, the sole language code will be present in the 008 field at positions 35-37.

Format

First indicator "0", second indicator blank, subfield delimiter, data element identifier "a", a language code, subfield delimiter, data element identifier "a", and a second language code. May also be followed by a third, fourth, etc., occurrence of: subfield delimiter, data element identifier "a", and a language code. The field ends with a field terminator.

Example

0 \$aeng\$ager\$aswe

0 \$aeng\$afre

100**Main Author****100****Description**

This field contains the name of the first or only author of the dissertation. If there is more than one author of a dissertation, the second and any subsequent author names will appear in 700 Added Entry fields.

Format

First indicator "1", second indicator blank, subfield delimiter, data element identifier "a", the first (or only) author's name, a comma, a subfield delimiter, data element identifier "e", and the relator term (ordinarily "author"). The field ends with a period and a field terminator.

Example

1 \$aDAVIS, WILLIAM CARL,\$eauthor.

245**Title Statement****245****Description**

This field contains the dissertation's title and statement of responsibility, and will occur once per record. A translated title may appear in the 740 Added Entry--Variant Title field.

Format

First indicator "1", second indicator a digit (0-9), subfield delimiter, data element identifier "a", the title of the dissertation, a space, a slash, subfield delimiter, data element identifier "c", the name of the first or only author (in inverted order). The names of a second or subsequent author will also appear (in inverted order) within this same subfield, after a space-semicolon-space string. The field ends with a period (or other mark of punctuation) and a field terminator.

Examples

14\$aTHE TOTAL SYNTHESIS OF CYTOVARICIN /\$cKaldor, Stephen Warren.

10\$aMODIFICACIONES FUNCIONALES DE LA ARTICULACION FEMORO-ROTULIANA TRAS INTERVENCIONES QUIRURGICAS SOBRE EL APARATO EXTENSOR /\$cMolina Ros, Antoni.

12\$aA problem-based learning project focused on the Missouri teacher quality standards /\$cSmith, Scott A. ; Cotter, Joshua C. ; Long, Jacob E.

264 Production, Publication, Distribution, Manufacture, and Copyright Notice

Description

This field contains details relating to the publication of a work.

Format

First indicator blank, second indicator "1", subfield delimiter, data element identifier "a", the place of publication ("Ann Arbor"), a space, a colon, a space, subfield delimiter, data element identifier "b", the name of the publisher ("ProQuest Dissertations & Theses"), and if the publication year is known: a comma, a space, subfield delimiter, data element identifier "c", and the year of publication. The field ends with a period (or other mark of punctuation) and a field terminator.

Examples

1\$aAnn Arbor : \$bProQuest Dissertations & Theses, \$c2013.

1\$aAnn Arbor : \$bProQuest Dissertations & Theses.

300
Physical Description**300****Description**

This field, when present, contains the number of pages in the dissertation. For DAI Parts A and B, there will be no 300 field for dissertations not available for sale by ProQuest. For DAI Section C, the absence of a 300 field means that the number of pages is unknown (many DAI Section C records represent titles which are not for sale by ProQuest).

Format

Two blank indicators, subfield delimiter, data element identifier "a", a description of the material as "1 electronic resource", a space, and--enclosed within parentheses--the number of pages in the material. The field ends with a field terminator.

Example

\$a1 electronic resource (469 pages)

336
Content Type**336****Description**

This field indicates the form of communication through which a work is expressed.

Format

Two blank indicators, subfield delimiter, data element identifier "a", a content type term, subfield delimiter, data element identifier "b", a content type code, subfield delimiter, data element identifier "2", and "rdacontent"--signifying the "Term and code list for RDA content types". The field ends with a field terminator.

Example

\$atext\$btxt\$2rdacontent

\$aunspecified\$bzzz\$2rdacontent

337**Media Type****337****Description**

This field indicates the general type of intermediation device required to view, play, run, etc., the content of the work.

Format

Two blank indicators, subfield delimiter, data element identifier "a", a media type term, subfield delimiter, data element identifier "b", a media type code, subfield delimiter, data element identifier "2", and "rdamedia"--signifying the "Term and code list for RDA media types". The field ends with a field terminator.

Example

```
$acomputer$bc$2rdamedia
```

```
$aunspecified$bz$2rdamedia
```

338**Carrier Type****338****Description**

This field indicates the format of the storage medium and housing of a carrier in combination with the media type (see field 337).

Format

Two blank indicators, subfield delimiter, data element identifier "a", a carrier type term, subfield delimiter, data element identifier "b", a carrier type code, subfield delimiter, data element identifier "2", and "rdacarrier"--signifying the "Term and code list for RDA carrier types". The field ends with a field terminator.

Example

```
$aonline resource$bcr$2rdacarrier
```

```
$aunspecified$bzu$2rdacarrier
```

500**General Note (Source)****500****Description**

This field contains source information: database identification, volume number or source code, and sometimes include page number(s) from the Dissertation Abstracts publication in which the citation and/or abstract first appeared. Volume/issue strings that include a trailing "(E)" indicate "electronic" volume numbers; they appear in cases where no corresponding physical volume was printed. Access to the database identification is provided in the 773 Host Item Entry field. DAI records include a Section designation (A, B, or C). DAI-C dissertations are not for sale by ProQuest Dissertations & Theses.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the source information. The field ends with a period and a field terminator. *Note: Publication page number is always 4 characters long and may have leading zeros.*

Examples

\$aSource: American Doctoral Dissertations.

\$aSource: American Doctoral Dissertations, Source code: S0028.

\$aSource: Dissertation Abstracts International, Volume: 51-06, Section: A, page: 1368.

\$aSource: Dissertation Abstracts International, Volume: 74-07(E), Section: A.

\$aSource: Masters Abstracts International, Volume: 28-01, page: 1473.

\$aSource: Masters Abstracts International, Volume: 51-01(E).

500**General Note (Publisher)****500****Description**

This field contains the name of another publisher of the dissertation. It appears only in some DAI section C records.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the publisher information. The field ends with a period and a field terminator.

Example

\$aPublisher info.: Reprint.

500**General Note (Advisor)****500****Description**

This field contains the name(s) of academic advisors or committee members, preceded by a designation of their function. The format is "Advisors: [name]; [name]; [name]. Committee members: [name]; [name]; [name]." The designation of function is followed by a colon-space pair, and multiple names are separated by a semicolon-space pair. Names appear in direct order, i.e. first name followed by last name. This field is optional, and may not occur more than once per record.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the advisor and committee member information. The field ends with a period and a field terminator.

Example

\$aAdvisors: Wallace E. Dixon, Jr. Committee members: William T. Dalton, III; Deborah L. Slawson.

500**General Note (Other)****500****Description**

This field contains additional notes, other than those relating to source, publisher, or advisor. This kind of note may occur only once per record.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the content of the note. The field ends with a period and a field terminator.

Example

\$aIncludes supplementary digital materials.

502**Dissertation Note****502****Description**

This field contains information about the degree: the degree earned by the author, the name of the granting institution, and the year the degree was granted. The degree awarded may be lacking for DAI Section C and some Canadian records.

Format

Two blank indicators, subfield delimiter, data element identifier "b", the degree earned, subfield delimiter, data element identifier "c", the name of the degree-granting institution, subfield delimiter, data element identifier "d", and the year the degree was granted. The field ends with a period and a field terminator.

Examples

\$bPH.D\$cHARVARD UNIVERSITY\$d1984.

\$cUNIVERSITAT AUTONOMA DE BARCELONA (SPAIN)\$d1988.

506**Restrictions on Access Note****506****Description**

This field indicates non-availability of the publication from ProQuest Dissertations & Theses, or restrictions that apply to the data being distributed. All DAI Section C dissertations and some DAI Sections A and B and MAI dissertations are not available for sale by ProQuest Dissertations & Theses and are so designated in this field.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the availability information. The field ends with a period and a field terminator. The field can appear more than once in a record, in cases where multiple restrictions apply.

Example

\$aThis item is not available from ProQuest Dissertations & Theses.

\$aThis item must not be added to any third party search indexes.

\$aThis item must not be sold to any third party vendors.

520**Abstract of Dissertation****520****Description**

This repeatable field contains the author-prepared abstract summary of the dissertation. Each 520 field represents a distinct paragraph of the abstract. On occasion--as in the last of the examples below--an additional note may appear, describing the dissertation as being a compound document.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the abstract paragraph. The field ends with a period (or other mark of punctuation) and a field terminator.

Examples

\$aThe dissertation advocates a "constructive" conception of legal interpretation as a way of making sense of judicial recognition of the emerging international law of human rights. A centerpiece of the study consists of cases in which United States courts recognize human rights such as freedom from torture and genocide as universalizable norms backed by a consensus of the world community. Emphasis is given to analyzing competing interpretations of jurisdiction, international custom, signatory intent, and the concept of universality in connection with the application of generalizable provisions from treaties, conventions, and declarations.

\$aUltimately the dissertation demonstrates how abstracting and universalizing central tenets of law-as-integrity's conception of rights interpretation from its domestic origins to international contexts yields a cogent philosophical basis for human rights adjudication.

\$a*This dissertation is a compound document (contains both a paper copy and a CD as part of the dissertation).

535**Location of Originals/Duplicates Note****535****Description**

This field contains the location of a reference copy. The field appears in some DAI Section C records only.

Format

First indicator "2", second indicator blank, subfield delimiter, data element identifier "a", and the location. The field ends with a period and a field terminator.

Example

2 \$aKarolinska Institute.

546**Language Note****546****Description**

This field will specify the language(s) of the dissertation or thesis. The language(s) named in this field will correspond to the language code in positions 35-37 of the 008 field as well as any additional language code(s) present in field 041.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and a statement of the language(s) of the dissertation or thesis. The field ends with a period and a field terminator.

Example

\$aEnglish and German.

\$aEstonian, Russian, and English.

590**Local Note (School Code)****590****Description**

This field contains ProQuest's school code for the institution awarding the degree. This MARC21 field is locally defined by ProQuest Dissertations & Theses. It allows a local system to provide the same level of access to MARC21-formatted ProQuest Dissertations & Theses records as is available in ProQuest's online databases. If access to School Codes is not desired, delete the 590 Local Note (School Code) and 790 School Code fields from the MARC21 record before loading it into the local system.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the school code information. The field ends with a field terminator.

Example

\$aSchool code: 0084

650**Subject Term****650****Description**

This field contains the subject term. This field is repeatable and will occur once for each subject term assigned to the dissertation.

Format

First indicator blank, second indicator "4", subfield delimiter, data element identifier "a", and the subject term. The field ends with a period and a field terminator.

Examples

4\$aMusic.

690**Subject Code****690****Description**

This field contains ProQuest's subject code. This field is repeatable and will occur once for each subject code assigned to the dissertation. This MARC21 field is locally defined by ProQuest Dissertations & Theses. It allows a local system to provide the same level of access to MARC21-formatted ProQuest Dissertations & Theses records as is available in ProQuest's online databases. If access to Subject Codes is not desired, delete the 690 Subject Code field(s) from the MARC21 record before loading it into the local system.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the subject code. The field ends with a field terminator.

Example

\$a0522

700 **Added Entry—Personal Name** **700**

Description

Each field contains an added author name. If there is more than one author of a dissertation, the first name appears in a 100 Main Author field and second and following names will appear in 700 Added Entry fields.

Format

First indicator "1", second indicator blank, subfield delimiter, data element identifier "a", the name, a comma, a subfield delimiter, data element identifier "e", and the designation "author". The field ends with a period and a field terminator.

Example

1 \$aLewis, Janet,\$eauthor.

710 **Added Entry—Corporate Name** **710**

Description

This field contains the name of the institution--and perhaps the department--awarding the degree. The field is repeatable; if a record identifies more than one department of an institution, each department will appear in a separate 710 field.

Format

First indicator "2", second indicator blank, subfield delimiter, data element identifier "a", and the name of the degree granting institution, followed by a period. May also be followed by a subfield delimiter, data element identifier "b", and the department with which the dissertation author (or authors) were associated, followed by a period. Will be followed by a subfield delimiter, data element identifier "e", and the relator term "degree granting institution". The field ends with a period and a field terminator.

Examples

2 \$aHARVARD UNIVERSITY.\$edegree granting institution.

2 \$aHarvard University.\$bBiology: Medical Sciences, Division of.\$edegree granting institution.

2 \$aUNIVERSITAT AUTONOMA DE BARCELONA (SPAIN).\$edegree granting institution.

2 \$aThe Chinese University of Hong Kong (Hong Kong).\$bEnglish.\$edegree granting institution.

2 \$aThe Chinese University of Hong Kong (Hong Kong).\$bLiterary Studies.\$edegree granting institution.

720 **Added Entry—Uncontrolled Name** **720**

Description

This field contains--in an uncontrolled form--the name of an individual identified as an advisor for a thesis or dissertation. The field is repeatable; if a record identifies more than one advisor, each will be named in a separate 720 field.

Format

First indicator "1", second indicator blank, subfield delimiter, data element identifier "a", and the name of an advisor. Will be followed by a subfield delimiter, data element identifier "e", and the relator term "degree supervisor". The field ends with a period and a field terminator.

Examples

1 \$aRoberto San Salvador del Valle Doistua\$edegree supervisor.

1 \$aOu Li\$edegree supervisor.

740**Added Entry—Variant Title****740****Description**

For DAI Section C records, if the main title is not in English, a translated title will appear in this added entry field.

Format

First indicator "0", second indicator "0", subfield delimiter, data element identifier "a", and the English translation of the title of the dissertation. The field ends with a period (or other mark of punctuation) and a field terminator.

Example

```
00$aFUNCTIONAL MODIFICATIONS OF FEMOROPATELLAR ARTICULATION AFTER SURGICAL INTERVENTION ON THE EXTENSOR.
```

773**Host Item Entry****773****Description**

This field contains source information--database identification and volume number or source code--formatted as a host item entry to provide access to the database ID. Complete source information--possibly including page number--is provided in the 500 General Note (Source) field.

Format

First indicator "0", second indicator blank, subfield delimiter, data element identifier "t", the database identification, subfield delimiter, data element identifier "g", and the volume/source information. An "(E)" at the end of a volume/issue string indicates an "electronic" volume number (i.e., no corresponding physical volume was printed). The field ends with a field terminator.

Examples

```
0 $tAmerican Doctoral Dissertations.
0 $tDissertation Abstracts International$g51-06A.
0 $tDissertation Abstracts International$g74-07A(E).
0 $tMasters Abstracts International$g28-01.
0 $tMasters Abstracts International$g51-01(E).
```

790**School Code****790****Description**

This field contains ProQuest's school code for the institution awarding the degree. This MARC21 field is locally defined by ProQuest Dissertations & Theses. It allows a local system to provide the same level of access to MARC21-formatted ProQuest Dissertations & Theses records as is available in ProQuest's online databases. If access to School Codes is not desired, delete the 590 Local Note (School Code) and 790 School Code fields from the MARC21 record before loading it into the local system.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the school code. The field ends with a field terminator.

Example

```
$a0084
```

791	Degree Name	791
------------	--------------------	------------

Description

This field contains the name of the degree(s) awarded. This field may be lacking for DAI Section C and for some Canadian theses. This MARC field is locally defined by ProQuest Dissertations & Theses. It allows a local system to provide the same level of access to MARC formatted Dissertation Abstracts records as is available from ProQuest's online files. If access to the Degree Name is not desired, delete the 791 Degree Name field from the MARC record before loading it into the local system.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the degree name(s). The field ends with a field terminator.

Example

\$aPH.D.
\$aPh.D. and D.Th

792	Degree Date	792
------------	--------------------	------------

Description

This field contains the year in which a degree was conferred. This MARC field is locally defined by ProQuest Dissertations & Theses. It allows a local system to provide the same level of access to MARC formatted Dissertation Abstracts records as is available from ProQuest's online files. If access to the Degree Date is not desired, delete the 792 Degree Date field from the MARC record before loading into the local system.

Format

Two blank indicators, subfield delimiter, data element identifier "a", and the year. The field ends with a field terminator.

Examples

\$a2008

856	Electronic Location and Access	856
------------	---------------------------------------	------------

Description

An optional, variable-length field containing a URI (uniform resource identifier). This string uniquely identifies and provides linking access to the electronic version of the record within the ProQuest system.

Format

First indicator "4", second indicator "0", subfield delimiter, data element identifier "u", and the URI. The field ends with a field terminator.

Example

40\$uhttp://gateway.proquest.com/openurl?url_ver=Z39.88-2004&rft_val_fmt=info:ofi/fmt:kev:mtx:dissertation&res_dat=xri:pqm&rft_dat=xri:pqdiss:T-00791

Appendix 2—Subjects, Subject Codes, General Subject Areas

0288	Education, Tests and Measurements	0399	Library Science
0532	Education, Theory and Practice to 1984, then see Education, Curriculum and Instruction 0727 or Education, Philosophy of 0998	0401	Literature, General
0747	Education, Vocational	0294	Literature, Classical New field 1975. Prior to 1975, see also Language and Literature, Classical 0587
0357	Fine Arts	0295	Literature, Comparative
0358	Folklore	0297	Literature, Medieval
0366	Geography <i>See</i> also Physical Geography 0368	0298	Literature, Modern New field 1975. Prior to 1975, see also Language and Literature, Modern 0589
0351	Gerontology New field 1981	0316	Literature, African New field 1980
0578	History, General	0591	Literature, American
0579	History, Ancient	0305	Literature, Asian
0581	History, Medieval	0352	Literature, Canadian (English) New field 1981
0582	History, Modern	0355	Literature, Canadian (French) New field 1992
0580	History, Archaeology to 1975, then see History, Ancient 0579 or Anthropology, Archaeology 0324	0593	Literature, English
0328	History, Black	0311	Literature, Germanic
0330	History, Church to 1984, then see related History fields or Religion, History 0320	0312	Literature, Latin American
0331	History, African	0315	Literature, Middle Eastern New field 1980
0577	History, American to 1975, then see related History fields	0313	Literature, Romance
0332	History, Asia, Australia and Oceania	0314	Literature, Slavic and East European
0334	History, Canadian	0708	Mass Communications
0335	History, European	0413	Music
0336	History, Latin American	0417	Oriental Literature and Linguistics to 1975, then see appropriate Language fields or Literature, Asian 0305 or Literature, Middle Eastern 0315
0333	History, Middle Eastern New field 1980	0422	Philosophy
0337	History, United States	0615	Political Science, General
0585	History of Science	0616	Political Science, International Law and Relations
0723	Information Science	0617	Political Science, Public Administration
0391	Journalism	0924	Public Relations to 1984, then see Business Administration, Marketing 0338
0679	Language, General New field 1975. Prior to 1975 see also Language and Literature, General 0586	0814	Recreation
0289	Language, Ancient New field 1975. Prior to 1975, see also Language and Literature, Classical 0587	0448	Religion to 1975, then see appropriate Religion subfield
0290	Language, Linguistics New field 1975. Prior to 1975, see also Language and Literature, Linguistics 0588	0318	Religion, General New field 1975. Prior to 1975, see also Religion 0448
0291	Language, Modern New field 1975. Prior to 1975, see also Language and Literature, Modern 0589	0321	Religion, Biblical Studies New field 1985
0586	Language and Literature, General to 1975, then see Language, General 0679 or Literature, General 0401	0319	Religion, Clergy New field 1975. Prior to 1975, see also Religion 0448
0587	Language and Literature, Classical to 1975, then see Language, Ancient 0289 or Literature, Classical 0294	0320	Religion, History of New field 1975. Prior to 1975, see also Religion 0448
0588	Language and Literature, Linguistics To 1975, then see Language, Linguistics 0290	0322	Religion, Philosophy of New field 1975. Prior to 1975, see also Religion 0448
0589	Language and Literature, Modern To 1975, then see Language, Modern 0291 or Literature, Modern 0298	0691	Social Science Methods To 1984, then see specific application
0398	Law		

- 0690 Social Science Theory to 1984, then see specific application
- 0452 Social Work
- 0626 Sociology, General
- 0627 Sociology, Criminology and Penology
- 0938 Sociology, Demography
- 0631 Sociology, Ethnic and Racial Studies
- 0628 Sociology, Individual and Family Studies
- 0629 Sociology, Industrial and Labor Relations
- 0630 Sociology, Public and Social Welfare
- 0634 Sociology, Regional and City Planning to 1975, then see Urban and Regional Planning 0999
- 0700 Sociology, Social Structure and Development
- 0344 Sociology, Theory and Methods
- 0637 Speech- Theatre to 1975, then see Speech Communication 0459 or Theater 0465
- 0459 Speech Communication
- 0943 Summaries of Musical Performances to 1975, then see Music 0413
- 0465 Theater
- 0469 Theology
- 0709 Transportation
- 0991 U.S. Office of Education Reports to 1975, then publication program discontinued
- 0999 Urban and Regional Planning
- 0453 Women's Studies
New field 1978
- The Sciences and Engineering**
- 0473 Agriculture, General
- 0285 Agriculture, Agronomy
Prior to 1975, see Agriculture, Agronomy 0712 or Agriculture, Soil Science 0481
- 0712 Agriculture, Agronomy to 1975, then see Agriculture, Agronomy 0285. Prior to 1975, see also Agriculture, Soil Science 0481
- 0475 Agriculture, Animal Culture and Nutrition
- 0476 Agriculture, Animal Pathology
- 0359 Agriculture, Food Science and Technology
- 0478 Agriculture, Forestry and Wildlife
- 0479 Agriculture, Plant Culture
Prior to 1975, see also Horticulture 0387
- 0480 Agriculture, Plant Pathology
- 0817 Agriculture, Plant Physiology
- 0777 Agriculture, Range Management
- 0481 Agriculture, Soil Science to 1975, then see Agriculture, Agronomy 0285. Prior to 1975, see also Agriculture, Agronomy 0712
- 0746 Agriculture, Wood Technology
- 0346 Applied Mechanics
- 0800 Artificial Intelligence
- 0731 Astronautics to 1984, then see Engineering, Aerospace 0538
- 0299 Astronomy to 1975, then see Physics, Astronomy and Astrophysics 0606
- 0983 Astrophysics to 1975, then see Physics, Astronomy and Astrophysics 0606
- 0301 Bacteriology to 1975, then see Biology, Microbiology 0410
- 0302 Bacteriology and Microbiology to 1975, then see Biology, Microbiology 0410
- 0303 Biochemistry to 1975, then see Chemistry, Biochemistry 0487
- 0425 Biogeochemistry
New field 1978
- 0484 Biology- Genetics
See also Biology, Genetics 0369
- 0306 Biology, General
- 0287 Biology, Anatomy
- 0308 Biology, Biostatistics
- 0309 Biology, Botany
- 0379 Biology, Cell
New field 1991
- 0329 Biology, Ecology
- 0353 Biology, Entomology
- 0369 Biology, Genetics
- 0793 Biology, Limnology
- 0410 Biology, Microbiology
- 0307 Biology, Molecular
New field 1984
- 0317 Biology, Neuroscience
New field 1984
- 0416 Biology, Oceanography
- 0433 Biology, Physiology
- 0821 Biology, Radiation
- 0778 Biology, Veterinary Science
- 0472 Biology, Zoology
- 0786 Biophysics, General
- 0760 Biophysics, Medical
- 0761 Biopsychology to 1975, then see Psychology, Psychobiology 0349
- 0485 Chemistry, General
- 0749 Chemistry, Agricultural
New field 1984. Prior to 1984 see Chemistry, Biochemistry 0487. Prior to 1973, see also Biochemistry 0303
- 0486 Chemistry, Analytical
- 0487 Chemistry, Biochemistry
Prior to 1973, see also Biochemistry 0303. After 1984, see also Chemistry, Agricultural 0749
- 0488 Chemistry, Inorganic
- 0738 Chemistry, Nuclear
- 0490 Chemistry, Organic
- 0491 Chemistry, Pharmaceutical
- 0494 Chemistry, Physical
- 0495 Chemistry, Polymer
- 0754 Chemistry, Radiation

Appendix 2—Subjects, Subject Codes, General Subject Areas

0826	Chemistry, Water to 1984, then see other related fields	0347	Health Sciences, Mental Health
0984	Computer Science	0569	Health Sciences, Nursing
0791	Energy	0570	Health Sciences, Nutrition
0537	Engineering, General	0380	Health Sciences, Obstetrics and Gynecology New field 1991
0538	Engineering, Aerospace Prior to 1984, see Astronautics 0731	0354	Health Sciences, Occupational Health and Therapy New field 1981
0539	Engineering, Agricultural	0381	Health Sciences, Ophthalmology New field 1991
0540	Engineering, Automotive	0571	Health Sciences, Pathology
0541	Engineering, Biomedical	0419	Health Sciences, Pharmacology
0542	Engineering, Chemical	0572	Health Sciences, Pharmacy
0543	Engineering, Civil	0382	Health Sciences, Physical Therapy New field 1991
0544	Engineering, Electronics and Electrical	0573	Health Sciences, Public Health
0348	Engineering, Heat and Thermodynamics	0574	Health Sciences, Radiology
0545	Engineering, Hydraulic	0575	Health Sciences, Recreation
0546	Engineering, Industrial	0460	Health Sciences, Speech Pathology
0547	Engineering, Marine	0576	Health Sciences, Surgery To 1975, then see Health Sciences, Medicine and Surgery 0564
0794	Engineering, Materials Science	0383	Health Sciences, Toxicology New field 1991
0548	Engineering, Mechanical, <i>See also Applied Mechanics 0346</i>	0386	Home Economics
0743	Engineering, Metallurgy	0387	Horticulture To 1975, then see Agriculture, Plant Culture 0479
0551	Engineering, Mining	0388	Hydrology
0552	Engineering, Nuclear	0405	Mathematics
0549	Engineering, Packaging New field 1984	0411	Mineralogy
0765	Engineering, Petroleum	0796	Operations Research
0554	Engineering, Sanitary and Municipal	0345	Paleobotany
0790	Engineering, System Science	0426	Paleoecology New field 1978
0768	Environmental Sciences	0985	Paleontology
0792	Fisheries	0418	Paleozoology
0996	Geochemistry	0427	Palynology New field 1978
0370	Geodesy	0368	Physical Geography <i>See also Geography 0366</i>
0374	Geological Survey	0415	Physical Oceanography
0372	Geology	0605	Physics, General
0373	Geophysics	0986	Physics, Acoustics
0428	Geotechnology New field 1978	0606	Physics, Astronomy and Astrophysics New field 1975. Prior to 1975, see Astronomy 0299 and Astrophysics 0983
0566	Health Sciences, General	0608	Physics, Atmospheric Science
0300	Health Sciences, Audiology	0748	Physics, Atomic
0764	Health Sciences, Biomedical To 1975, then see related fields	0607	Physics, Electronics and Electricity
0992	Health Sciences, Chemotherapy	0757	Physics, Elementary Particles To 1975, then see Physics, Elementary Particles and High Energy 0798
0567	Health Sciences, Dentistry	0798	Physics, Elementary Particles and High Energy New field 1975. Prior to 1975, see Physics, Elementary Particles 0757 and Physics, High Energy
0350	Health Sciences, Education New field 1975		
0769	Health Sciences, Hospital Management		
0758	Health Sciences, Human Development		
0568	Health Sciences, Hygiene		
0982	Health Sciences, Immunology		
0564	Health Sciences, Medicine and Surgery Prior to 1975, see also Health Sciences, Surgery 0576		

- 0797
- 0759 Physics, Fluid and Plasma
- 0797 Physics, High Energy
To 1975, then see Physics, Elementary Particles and
High Energy 0798
- 0609 Physics, Molecular
New field 1975. Prior to 1975 see also Physics,
Molecular Spectroscopy 0744 and Physics,
Spectroscopy 0612
- 0744 Physics, Molecular Spectroscopy
To 1975, then see Physics, Molecular 0609
- 0610 Physics, Nuclear
- 0752 Physics, Optics
- 0756 Physics, Radiation
- 0611 Physics, Solid State
- 0612 Physics, Spectroscopy
To 1975, then see Physics, Molecular 0609
- 0795 Plastics Technology
- 0621 Psychology, General
- 0384 Psychology, Behavioral
New field 1991
- 0622 Psychology, Clinical
- 0620 Psychology, Developmental
New field 1978
- 0623 Psychology, Experimental
- 0624 Psychology, Industrial
- 0625 Psychology, Personality
New field 1984
- 0989 Psychology, Physiological
- 0349 Psychology, Psychobiology
- 0632 Psychology, Psychometrics
New field 1984
- 0451 Psychology, Social
- 0799 Remote Sensing
New field 1983
- 0463 Statistics
- 0994 Textile Technology
